PROJECTS

Toy Troops -

[client site](#) [server site](#) [live Website](#)

- The toy website project aims to create an interactive platform where users can register, login, and enjoy exclusive benefits.
- Registered users will have the ability to add toys to their collection by providing relevant information, as well as view and manage their existing toys..

Technologies -

This website was built using react js for the client site. Using firebase to handle user registration and login. For the backend node js and express js were used also MongoDB used for the database.

Mr Chef -

[client site](#) [server site](#) [live website](#)

- Mr Chef is the restaurant website based project that aims to create a user-friendly platform where visitors can explore various features such as user registration, login, and access to exclusive benefits for logged-in users.
- The primary focus is to provide users with an enjoyable and informative experience while showcasing the culinary expertise of the restaurant's chefs...

Technologies -

This website was built using react js for the client site. Using firebase to handle user registration and login. For the backend node js and express js were used also MongoDB used for the database.
